

Supra: New eKEY authorization code feature

Supra announces a new way for you to authorize your Supra eKEY app. This new feature makes it easy to obtain an authorization code if you get a new phone or need to re-install the eKEY app.

To obtain an authorization code from the eKEY app:

1. Launch the **eKEY app**
2. Select **Activate eKEY App** and the screen below is displayed

The screenshot shows a mobile application interface for 'Supra eKEY'. At the top, the text 'Supra eKEY®' is displayed in blue, with 'Get Authorization Code' underneath in a smaller blue font. Below this, there are two input fields: the first is labeled 'Enter email or phone number' and the second is labeled 'Enter PIN Code'. A dark grey button with the word 'SUBMIT' in white capital letters is positioned below the input fields. At the bottom of the screen, there is a blue hyperlink that reads 'Already have an authorization code?'.

3. Enter **email address** or **phone number**
4. Enter **4-digit PIN code** (this is the code you use to access the key container on a KeyBox)
5. Click **Submit**

You will receive an email or text message (depending on whether you entered an email address or phone number) containing a link. Click that link to automatically authorize the eKEY app.

Note: If you choose to receive the authorization code via email and you have not received the email after clicking Submit, please check your Spam or Junk folder(s).

An authorization code can still be obtained from SupraWEB, Mobile SupraWEB or by contacting the Association office.
