

Mounds View Regulations

These Regulations have been taken directly from the city's website. Information deemed reliable but not guaranteed. Please consult government websites for most current regulations.

Sign Ordinance Regulations

A sign may be placed on the property no larger than 10 square feet.

Point of Sale Regulations

As part of Mounds View's Water Preservation Program (H2OPP), the City Council adopted [Ordinance 967](#) which requires all property owners, at the point of sale or transfer of their property, to have the sewer service line from the property to the sewer main, televised and if needed, rehabilitated or repaired. The sewer service line is called the "lateral" and is the responsibility of the property owner. The goal of the program is to eliminate the infiltration of ground water into the sanitary sewer system'

The property owner must fill out an [Inspection Application](#) for a Inflow and Infiltration Inspection. The cost for this application is \$150.00. **The property owner will need to hire a company to televise the sewer line.** (See document section below for application and a list of contractors.) The City has partnered with Paul Bunyan Plumbing, 612-977-3062, and they are televising for \$139.00. For more information, visit:
